You have been a valuable and supportive member of the NLSY79 sample for many years, and we very much appreciate your continuing cooperation.

This round, we would like to enlist your help with a small experiment. People often have difficulty remembering exact amounts of income. We are trying to determine the best way to ask about estimated income when someone can't remember an exact amount. For the following question(s) there is no need to give me an exact amount of income. Please just give me an estimate of the income amount for 1999. We will be asking you about income during 2001 later in the survey.

We very much appreciate your continuing cooperation and your help in this experiment.
